One of the most singular things about our climate is the great change that has taken place within the past few years. Rain is more frequent than formerly, indeed it is generally believed that small grain could have been raised in Wallapai or Sacramento valleys in either of the past three years. Many people believe that this change is caused by the railroad, as it is asserted that the extension of railroads through the arid belts east of the Rocky Mountains with them. Whether this is so or not there has certainly been a great and favorable change. -Mohave Miner.

A Few Facts About Dancing. I tremble for this letter, fearing

that no man will read it, for it deals in facts. Facts are so dull. 1st. Dancing is natural and right. It is the other half of music. Neither music nor dancing can be called an evil. They go together, hand in hand, and must abide by the same judgment. When music began, dancing began. So long as the former continues, the latter must continue. Then it is morally proper to dance if you want to.

2d. There is no known accomplishment so cheaply obtained as the one of graceful dancing, and none that will carry you farther into the heart and core of good society. Thousands of dollars you may spend to become a fine musi cian. Unless you are talented you fail totally. To become an elegant waltzer requires no special talent.

3d. Can you dance already? Investigate your case and see. The fact that your partner claimed to enjoy that waltz, is no sign whatever. She told you that it was splendid, but she whispered to her seat-mate that you were horrid! Remember that politeness debars her from calling you the bore which

4th. If you cannot dance a little bit, do not pretend that, in days gone by, you were a champion. Every old dancer knows that the waltz, once it is mastered, never can be forgotten.

5th. You may be a brainy man, with capital to back you, but if you can't dance you are no good in the ballroom. And any of your inferiors, who are educated dancers, can beat you on such an occasion. But you know that, already. You have

Cannibalism in Brazil. NEW YORK, July 9 .- A little threecolumn newspaper printed in the in-terior of Brazil, which reached here to-day, contains a horrible story of cannibalism. A man named Clements Vieria is under arrest at Salinas state of Minas, Brazil, charged with eating human flesh. In a talk with the editor he said for some time he and a number of others had lived upon human flesh, and when asked what motive impelled them to such barbarous acts, said it was because they liked it. When asked how they secured the first victim, he said he went one day to the house of a friend named Leandro, who invited him to eat a piece of his (Leandro's) dead child. He was hungry and did so. The following day he found a woman asleep by the road-side, killed her and took the body home. Soon after he killed a friend named Simplisios and with the assistance of Francisco and Severa ate him. When his flesh was all gone Simplisios' two sons were killed for further supply of food. Later on Basilio and the prisoner killed and devoured Fran. cisco and finally Veiria having discovered that Basilio had stolen a shirt from him, killed him. He ate very little of him, however, for he was arrested within two days of the show cause why their assessments on murder. Veiria was captured in the city property should not be increased: act of making a meal of a portion of Basilio's remains. The soldiers found & Coffin, Jerome; W. F. W. J. Chamberlain & Co.'s, financial circular, published at Denver, has the following review for the week: The commercial world moves on, but it moves slowly just now, and it is evident that we must wait a bit for anything like great activity. The continued shipments of gold (nearly \$3,000,000) last week made the total thus far this season about \$75,000,000. Had this been known three months ago, the conservatives would have expected a double-compound-back-action panic ere this, but no special disturbance has occurred, and to the contrary, the money at the large centres is accumulating, and interest is low. Secretary Foster decided to extend 41 per cent. bonds on and after September 2, 1891, at 2 per cent. interest. He has also decided to convert some of the trade dollar bullion into standards, and to exchange about \$3,000,000 of small silver into certificates. Bullion certificates were dealt in at the New York Stock Exchange to the extent of 70,000 ounces up to 102. The railroad stock mar-

carried them up just about as much as they had lost within the past few Sale of Coconino County Bonds. The following order was passed by the Board of Supervisors, July 3d, 1891: A proposition from the 7 00 agents of Mr. Sol Lewis, of San J. N. Rodenburg, interpreter 10 00 first series (extending from 1 to 75 32 00 bonds having been received, the 8 00 Board, after a careful computation 2 00 of the income arising from holding the 7 per cent, bonds and the accrunently located at Prescott. 10 00 | the 7 per cent, bonds and the accru-12 00 ing interest upon Yavapai County

Greatest Curiosity on Earth.

At a recent show in London, if an exchange can be believed, a gentleman took his fourteen daughters along, and they were exceedingly anxious to see and hear the Edison phonograph, attached to which is an extra charge of sxipence a head He approached the gate and asked:

"Got the phonograph in here?"
"Yes, sir," came the answer; "six pence, please.' "Sixpence, you say. That's for me, of course; now, what do you charge for my party! I've got four teen daughters here, and they all want to see the curiosities.

"Fourteen daughters did say?" observed the man at the gate, W. T. Rowe, district No. 7... 534 30 with an awed look upon his stolid

"Well, you just walk right in, sir, with your fourteen daughters, they'll be greater curiosities than the Edi son phonograph."
